📁 Portfolio

OBJECTIVE

Young software engineer passionate about Full Stack development and DevOps technologies, seeking a first professional opportunity or internship in software development. Motivated to design, deploy, and optimize modern, secure, and scalable applications while applying best practices in software architecture and automation.

PROFESSIONAL EXPERIENCE

Final Year Internship - Full Stack Software Engineer | Soufiane Foods SARL | Feb. - Jul. 2026

- Designed and developed a web platform for managing cold storage space reservations, from request submission to reservation tracking.
- React/TypeScript, Spring Boot, PostgreSQL, Figma, JWT/Spring Security, WebSocket, Docker and VPS deployment.

End-of-Year Internship (PFA - Engineering Cycle) | FST of Fez | Jul. - Aug. 2025

- Designed a web application for digitizing library services: loans, books and users management.
- React.js, Spring Boot, MySQL, Postman, Figma, JWT/Spring Security and Docker.

Initiation Internship | Centrale Danone - Casablanca | Jul. - Aug. 2024

- Developed a mobile application for retailers to place and track orders with customer management and sales reporting.
- React Native, Spring Boot, MySQL, Postman and Figma.

Bachelor Final Project | Dental Clinic - Casablanca | Apr. - Jun. 2023

- Developed a mobile application for appointments, medical records, medications and patient assistance services.
- Python, Kivy/KivyMD, PyMongo and MongoDB.

EDUCATION

State Engineering Degree in Intelligent, Communicating and Mobile Systems | FST of Fez | 2023 - 2026

Licence in Science and Technology - Computer Science, Networks and Multimedia | FST of Mohammedia | 2022 - 2023

DEUST - Mathematics, Computer Science and Physics | FST of Mohammedia | 2020 - 2022

Baccalaureate - Physical and Chemical Sciences | Casablanca | 2018 - 2019

ACADEMIC PROJECTS

Intelligent Road Sign Detection System | Python, OpenCV, TensorFlow, Keras, KivyMD

Designed a road sign detection and classification solution integrating image processing, deep learning and an application interface.

New Lossless Audio Compression Format | Python, Tkinter, NumPy, Pydub, Huffman, RLE

Developed a lossless audio compression/decompression format based on Huffman and RLE algorithms with a graphical interface.

Hotel Reservation Web Platform | React.js, FastAPI, MySQL

Designed and developed a hotel reservation platform based on a front-end/back-end architecture and relational database.

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL, PHP, C/C++.

Frameworks & Libraries: Spring Boot, FastAPI, React.js, React Native, Kivy/KivyMD, OpenCV, TensorFlow, Keras, Pandas, NumPy.

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Redis (Caching).

Security & DevOps: JWT, Spring Security, Docker, Git/GitHub, GitHub Actions (CI/CD), VPS, Linux, Docker Compose, Kubernetes, Terraform, AWS.

Software Architecture: Microservices, API Gateway, Kafka, RESTful APIs.

Tools: Postman, Figma, VS Code, IntelliJ IDEA, PyCharm, Jupyter Notebook, StarUML.

Networks & Communicating Systems: RTOS, QoS, Ad Hoc Networks, HTTP, MQTT, IPv4/IPv6, Network Security.

Testing & Quality Assurance: JUnit 5, Selenium, Postman.

LANGUAGES

Arabic: Native language | French: Reading, speaking and writing | English: Reading, speaking and writing
